Project Name	Virtual Agent-Driven SLA Breach Awareness & Justification System

No. of Functional Features Included in the Solution

Functional Features Overview:

This document lists the functional features included in the Virtual Agent-Driven SLA Breach Awareness & Justification System. Each feature is designed to enhance SLA governance and accountability through proactive awareness and real-time reporting.

S.No	Feature Name	Feature Description	Module / Component	Status
1	Custom SLA Definitions	Creation of Resolution SLAs with specific start, stop, and pause conditions for incident tasks.	SLA Management	Done ▾

S.No	Feature Name	Feature Description	Module / Component	Status
2	Data Architecture Customization	Implementation of custom fields: SLA Breach Reason, Justification, and Acknowledgment.	Database / Tables	Done ▾
3	Automated Flow Notifications	Triggers for "At Risk" and "Breached" notifications when thresholds (e.g., 80%) are met.	Flow Designer	Done ▾
4	Virtual Agent SLA Topic	Conversational interface for users to acknowledge risks and provide breach justifications.	Virtual Agent	Done ▾
5	Dynamic UI Policies	Rules to make SLA justification	UI Logic	Done ▾

S.No	Feature Name	Feature Description	Module / Component	Status
		and reason fields mandatory when the SLA is at risk.		
6	Analytic SLA Dashboards	Visual reporting on breaches by assignment group, reason, and assignee performance.	Reporting	Done ▾

Feature Summary:

Metric	Count/Value
Total Features Planned	6
Total Features Implemented	6
Core / Must-Have Features	5
Additional / Nice-to-Have Features	1
Features Tested & Verified	6

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	Virtual Agent Topic, UI Policies	SLA Awareness Topic, Mandatory Reason Fields
2	Backend / Logic	Flow Designer Workflows	SLA At Risk Email Notifications
3	Database / Storage	Custom Table Columns	SLA Breach Reason Choice List
4	Reporting	Performance Dashboards	SLA Breaches by Assignment Group
5	Automation	SLA Engine Integration	Automated "At Risk" Flag Trigger

This solution provides a centralized visibility system that ensures all incidents approaching breach are properly tracked and justified before closure.
