Communication

Communication Plan:

Effective communication is essential for a successful project demonstration. This document outlines the communication strategy used within the team and with stakeholders throughout the project lifecycle, including how updates, issues, and feedback were managed for the Virtual Agent-Driven SLA governance system.

S.No	Communi cation Type	Frequenc y	Channel/ Tool	Participa nts	Purpose
1	SLA Warning	Threshold -based (≥80%)	Email / Flow Designer	Assigned To	To provide proactive

S.No	Communication Type	Frequency	Channel/ Tool	Participants	Purpose
	Notification				awareness of approaching SLA breach.
2	Manager Escalation	Threshold -based (Critical)	Email / Dashboard Link	Assigned To's Manager	To ensure management visibility of at-risk service levels.
3	SLA Justification Intake	On-demand / Triggered	ServiceNow Virtual Agent	Assigned To / User	To capture acknowledgment and breach reasons via conversational interface.

S.No	Communication Type	Frequency	Channel/ Tool	Participants	Purpose
4	Governance Reporting	Real-time / Daily	Analytics Dashboard	Admin / Stakeholders	To visualize breach distribution and justification status across the team.
5	System Status Update	Automated	Incident Work Notes	Incident Assignees	To log governance activation when threshold is crossed.

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Lack of structured accountability for SLA breaches.	Implemented UI Policies to make SLA Breach Reason and Justification

S.No	Challenge Faced	Resolution / Action Taken
		mandatory when SLA is "At Risk".
2	Delayed awareness of SLA status by managers.	Configured Flow Designer to automatically email managers a direct link to the SLA Governance Dashboard.
3	Manual process for capturing user acknowledgment.	Developed a conversational Virtual Agent topic to guide users through acknowledgment and justification steps.
