

Project Demo Planning

Date	XXXXX
Team ID	XXXXX
Project Name	Virtual Agent-Driven SLA Breach Awareness & Justification System
Maximum Marks	1 Mark

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the "Virtual Agent-Driven SLA Breach Awareness & Justification System," which enhances SLA governance through proactive awareness and real-time accountability using ServiceNow Admin capabilities.

5	Virtual Agent	Conversational justification capture and SLA risk acknowledgment walkthrough.	3	 Person
6	Dashboards	Reviewing "SLA Governance & Accountability Dashboard" and breach reason reports.	2	 Person

Demo Flow Summary

Step	Activity Notes
1	Introduction & Problem Statement: Discuss manual SLA tracking issues and the need for structured justification.
2	Solution Overview: Highlighting the no-code approach using Flow

Step	Activity Notes
	Designer, UI Policies, and Virtual Agent.
3	Live Feature Demonstration:
	• Create an Incident and show SLA attachment.
	• Simulate a 80% threshold breach to trigger emails.
	• Use the Virtual Agent to provide justification and acknowledge risk.
	• Display the updated Dashboard with real-time breach distribution charts.
4	Q&A Session: Addressing technical queries regarding the ITSM Virtual Agent plugin and table configurations.
