

SLA Breach Awareness & Justification Journey Map

Project Name: Virtual Agent-Driven SLA Breach Awareness & Justification System

Date: XXXXXX

Team ID: XXXXXX

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1: Incident Creation & Monitoring	Stage 2: SLA Warning (Proactive Awareness)	Stage 3: SLA Breach & Justification
Actions	User creates a new Incident and fills mandatory fields. The system attaches the SLA definition and starts the countdown.	The SLA timer crosses the 80% threshold. The system triggers a notification to the assigned user.	The SLA breaches. The user must provide a breach reason and justification via the Virtual Agent or Incident form.
Touchpoint	ServiceNow Incident Form.	Email notification and Virtual Agent (VA) popup.	ITSM Virtual Agent Conversation and SLA Governance Dashboard.

Phase of Journey	Stage 1: Incident Creation & Monitoring	Stage 2: SLA Warning (Proactive Awareness)	Stage 3: SLA Breach & Justification
Customer Thought	"I hope this issue is resolved within the promised timeframe".	"I need to prioritize this ticket immediately to avoid a breach".	"I need to explain why this delay happened to remain compliant".
Customer Feeling	Expectant and focused on resolution.	Alerted and slightly pressured.	Accountable and focused on documentation.
Process Ownership	ITIL User / Assignee.	Flow Designer (Automated Notification).	Virtual Agent & Incident Management System.
Opportunities	Automated prioritization based on caller impact.	Real-time escalation to managers via the Dashboard if no action is taken at 90%.	Integration with root cause analysis to auto-suggest "SLA Breach Reasons".

Project Overview

The **Virtual Agent-Driven SLA Breach Awareness & Justification System** enhances SLA governance by introducing proactive awareness, structured accountability, and real-time reporting. The system is implemented using ServiceNow Administrative capabilities, including Flow Designer for notifications, UI Policies for field enforcement, and Virtual Agent for conversational justification capture.

Key Performance Indicators

- **SLA Performance Trend:** Tracking breach volume over time to identify systemic issues.
- **Justification Compliance:** Ensuring 100% of breached incidents contain a valid "SLA Breach Reason" (e.g., System outage, Dependency on third party).
- **Acknowledgement Rate:** Measuring the percentage of users who acknowledged SLA risks via the Virtual Agent.
