

Date : XXXXXX

Team ID : XXXXXX

Project Name : Virtual Agent–Driven SLA Breach Awareness & Justification System

Maximum Marks : XXXXXX

Executive Summary

The purpose of this project is to develop a ServiceNow-integrated Virtual Agent system designed to enhance SLA breach awareness. By providing proactive notifications and automated justification workflows, the system aims to reduce unnoticed breaches and improve overall service accountability.

Project Initialization and Planning Phase

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

- I am: Applicant seeking a loan
- Trying to: Secure a loan for property
- But: Married with no co-applicant income
- Because: Self-employed with a good credit history
- Which makes me feel: Optimistic about loan approval

Problem Statement (PS) Template

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An IT Service Desk Assignee managing ticket queues.	Resolve incoming system incidents within predefined thresholds.	Incidents approach milestone targets silently.	Static alerts get lost in high-volume queues.	Reactive, stressed, and personally unaccountable.
PS-2	Engineering Lead.	Ensure high system availability and compliance.	SLA breaches often go unnoticed until post-mortem reports.	Lack of proactive, real-time notification mechanisms .	Anxious about recurring service instability.
