Maximum Marks	3 Marks

Project Initialization and Planning Phase

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

I'm trying to	But	Because	Which makes me feel
Applicant seeking a loan	Married with no co-applicant income	Secure a loan for property	Self-employed with a good credit history
			Optimistic about loan approval

Problem Statement (PS)

PS-ID	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	IT Service Desk Assignee or Manager.	Maintain high SLA compliance and structured accountability for incident resolution.	SLAs are often breached without timely awareness or documented reasons.	There is a lack of proactive notification and a centralized way to capture justifications like "Dependency on third party".	Concerned about audit readiness and the inability to visualize breach distribution accurately.
